SUMMARY OF INFORMATION

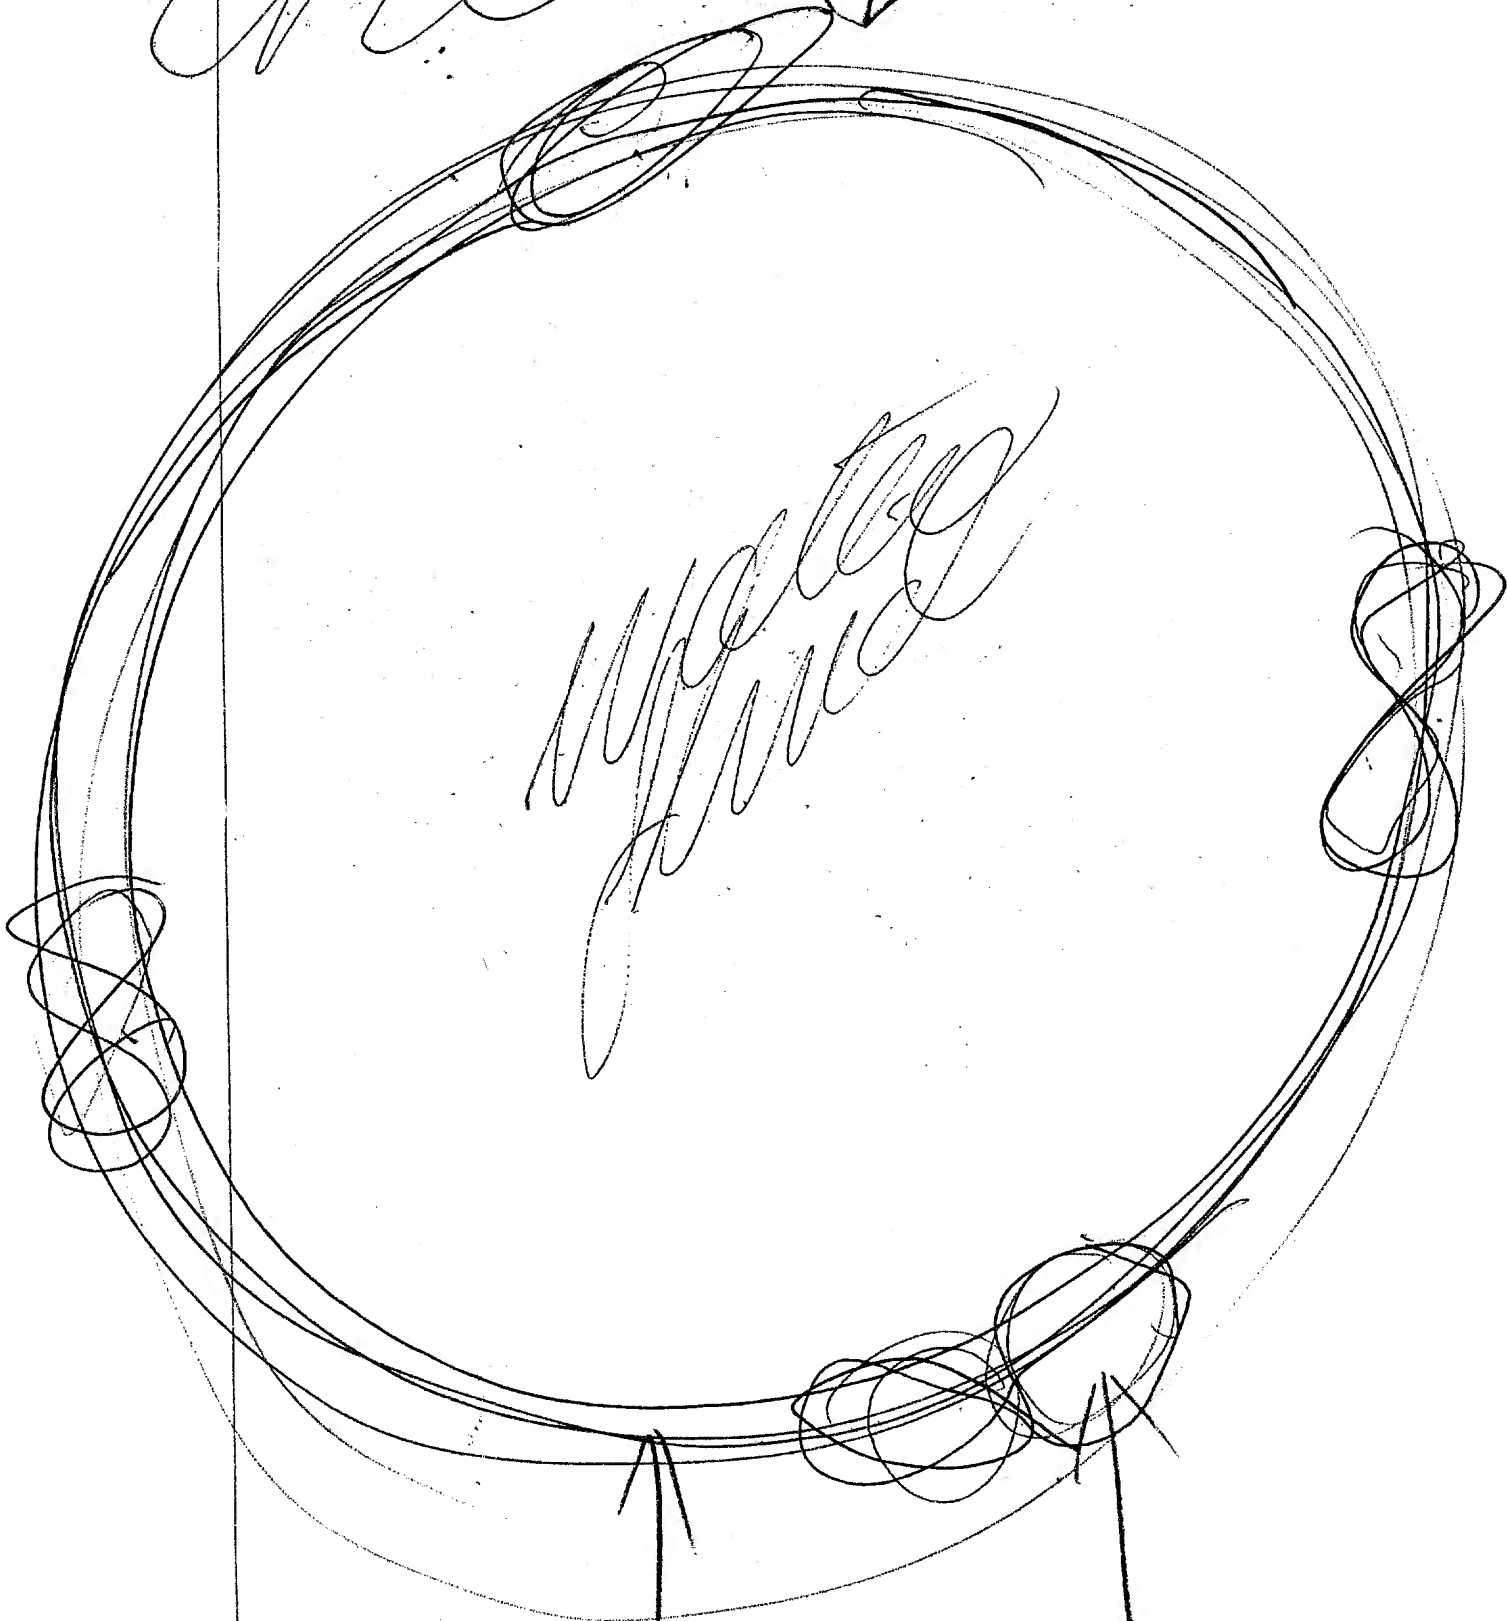

In a land area, energy objects (hydro) are located. A hierarchy of military personnel are at the site. The rounded objects utilize resources. They contain a liquid substance and make a roaring high pitched sound. At first, these objects are hidden from view, but are purposely placed in order to be triggered. Something is cramped/placed snugly (golfed) in a hole. When triggered, a separation occurs. They are set in a guided motion with speed and are unable to turn abruptly. Metallic gunning/piping, a raking texture, and spiraling energy is involved. See attached sketches.
